It may not otherwise be reproduced or transmitted in any form or by any means (including photocopying and recording) or used for any other purpose without the written permission of Groupama Healthcare.

Introduction

This relative fee schedule covers the more common procedures carried out by physicians and surgeons. It is intended that this should be used as a guide to the maximum and not the standard fee for a given procedure and these fees relate solely to the specialist's time and expertise and do not reflect associated hospital costs.

Specialists are requested to advise their patients if, in a particular instance and for whatever reason, their professional fees are anticipated to exceed those indicated in this Schedule.

Structure of Schedule:

Procedure codes - to ensure consistency the codes used are in accordance with those developed by the CCSD Group. Wherever possible the Procedure Code Number should be entered on the account to ensure early payment of the claim.

Description of procedure - the medical description identifies the specific service(s) performed and, where appropriate, whether such procedures are considered to include other associated items, multiple or bilateral operations.

Surgical benefits:

It is assumed that reimbursement of surgical fees encompasses all pre- and post-operative care including the management of all common complications relating to the condition being treated. The management of bleeding, uncomplicated sepsis, catheterisation, removal of sutures, suction, intravenous fluids and all medications are included in the fee for the procedure as is the return of the patient to the operating theatre.

It is acknowledged that concomitant disease or unrelated complications may arise and, especially where other specialist opinion is sought, further fees may be justifiable.

Fees for procedures not listed in this Relative Fee Schedule should be submitted in the normal way and should be such that are normal and customary for the procedure in question.

Hospital admission is not a prerequisite for remuneration of fees. Day-surgical and outpatient surgical fees are equally applicable.

Anaesthetic benefits:

Anaesthesia (general or local) administered by an Anaesthetist will be assumed to encompass the preoperative assessment, induction, maintenance and monitoring of anaesthesia during the procedure as well as post-operative anaesthetic care. The postoperative care will, if required, include the first 72 hours of Intensive Care.

The use of supplementary epidural or local anaesthesia will be reimbursed to the Anaesthetist in a similar manner to Multiple Procedures applied to surgical intervention - see below under Multiple Procedures.

Stand-by fees require the Anaesthetist to be physically present with the patient during the course of the procedure without any other commitment.

Multiple Procedures :

The following applies individually to the Surgeon and to the Anaesthetist:

If two clinically necessary procedures are performed during a single operation (under the same anaesthetic) the additional procedure will earn a supplement of 25% of the most highly rated of the two procedures.

If three or more clinically necessary procedures are carried out during a single operation the supplement of 25% will be replaced by 40% of the most highly rated procedure.

'Incidental' procedures carried out at the same time, but not clinically necessary, will not be entitled to additional benefit (e.g. incidental appendectomy during other intraabdominal procedure)

Unbundling:

When one or more lesser procedures form an integral part of the main procedure, they will be deemed to be included in the overall remuneration of that main procedure. Such a lesser procedure will only be eligible for reimbursement if it is performed as a single, stand alone, procedure. e.g. peripheral iridectomy performed during cataract extraction is deemed to be an integral part of the main procedure.

Bilateral Procedures:

The CCSD Group has now developed codes which are specific for most of the bilateral procedures that are carried out, and recognise the additional complexity entailed. These codes are used in this Schedule.

This Schedule is not intended to be comprehensive but, for ease of handling, has been designed to cover the most commonly performed procedures.

Groupama Healthcare will continue to update this Schedule in line with new codes released by the CCSD Group.

ABDOMEN (OTHER THAN URINARY AND REPRODUCTIVE ORGANS)

ABDOMINAL WALL				
CCSD	PROCEDURE	PROCEDURAL AMOUNT	ANAESTHETIC AMOUNT	THEATRE CLASS
T1900	Simple excision of inguinal hernial sac (herniotomy) - unilateral	£318.00	£159.00	INTER
